

Discover "Value" ...

Enterprise Value Maximization (EVM)

With our Total Business Excellence Model we at BizXL Solutions help you unlock and discover value!

Whether it is capturing “share of the wallet” or “overall market”...

...we build coalitions with existing local teams, augment resources and are not afraid of rolling up our sleeves to help realize quantifiable topline/ bottom-line impact.

We have a well-structured three step approach for client engagements.

Initial Assessment: Over 1-2 weeks we partner with client teams to understand the challenges and key business drivers and define the high level “go/no go” decision criteria.

Diagnostic Assessment: This is a deep dive. This delivers a business case based prioritized recommendations for implementation.

We partner with internal teams to design and deliver a self-funding implementation plan with guaranteed ROI within 6 to 12 months of implementation.

Implementation: We mobilize and deploy resources to implement recommendations and realize the economic value add.

Enterprise Value Maximization (EVM)

FEATURES	STAGES		
	1. INITIAL ASSESSMENT	2. DIAGNOSTIC	3. IMPLEMENTATION
Duration	5 - 10 Business Days	45 - 60 Business Days	60 - 120 Business Days

Our leadership team has extensive international experience of working with some of the largest and world’s best run organizations such as **General Electric, Delphi Automotive Systems, Royal Bank of Canada, Manulife Financial, Whirlpool, Eaton Corporation,**

Johnson & Johnson, Komatsu Ltd., and some of the top management consulting firms blending strategic thinking with hands-on implementation.

“Not just fresh B - school grads learning at your expense...we are seasoned executives and subject matter experts with decades of experience.”

We are experienced and we add value from Day 1.

We have a practical and pragmatic approach for solving business problems and use our structured **Total Business Excellence (TBE™)** methodology coupled with relevant tools and templates to develop customized solutions.

Our TBE™ methodology helps break the organizational silos thus reducing complexity and improving business speed.

In most of our projects we come out with 70-80% of “Non Technology” recommendations that provide quick and measurable bottom line results.

Our leadership team and our consultants have worked across domains and across industries and are active Lean Six Sigma certified practitioners with MBA/ CA/ B. Eng./ PHD /MD qualifications.

At BizXL Solutions, we believe in “Less is More”.

We partner with internal teams to solve top business issues such as reducing cost, improving operational performance, improving employee engagement, and change management through our research based **Total Business Excellence [TBE™]** model. Our model blends advanced Lean Six Sigma methodology and an End to End focus with sophisticated Business Management and Data Analytics tools and techniques to maximize value creation.

What gets measured, gets done.

Designing effective metrics and measures defines the focus of the organization and the direction of results. At times organizations go overboard on trying to measure everything, while at times even the basic metrics are not in place. Both lead to sub optimal performance.

BizXL helps define the correct metrics to monitor and drive organizations towards the achievement of the corporate strategy and goals.

Visual management is very powerful when used to manage operational performance.

We help with business analytics to provide valuable insights and design dashboards for the management team as a decision support mechanism.

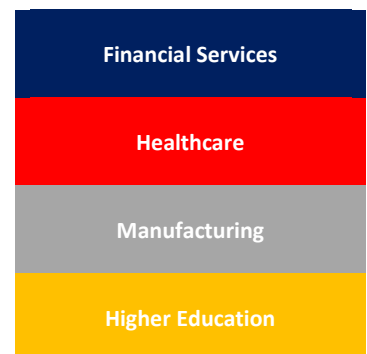

BizXL Solutions Inc. a boutique management consulting firm, takes pride in partnering with our clients to improve business performance and enterprise risk management.

We specialize in maximizing shareholder value by supporting

organizations through a unique blend of strategic thinking, Lean Six Sigma Management discipline, Big Data Analytics and expertise in the design and testing of internal controls for Governance, Risk and Compliance.

Our focus is on *“Minimizing Waste and Maximizing Value Creation”* for our clients across all aspects of the business value streams.

The Verticals that we currently serve are:

“We also take pride in facilitating International mergers and creation of strategic alliances globally.”

“Our Mission is to create a sustainable competitive advantage for our clients by delivering customized solutions for improving business performance and enterprise risk management.”

Discovering “value” ...is just getting started!
